IHCO Standard Mica Insulated Heater Bands

IHCO has manufactured OEM and aftermarket replacement mica heater bands for over fifty years for machinery manufacturers and processors in the USA, Europe, and the Pacific. IHCO mica band heaters are used on injection molding, extrusion, blow molding and other equipment and can be found worldwide in plastics molding, packaging, pipe, profile, wire coating, film, and sheet extrusion, along with other heated cylinder applications. The mica heater band offers a multitude of designs, features and mounting options. IHCO is a perfect fit every time.

Benefits

- **High Quality at a Low Cost**
- **Thin Wall Quick Response**
- **Rust Resistant Construction**
- **Up to 50 W/In² in Watt Density**
- **Operating Temperatures up to 1000F**
- **Versatility Easily Made to Order Specifications**

XT High Temperature Mica Band Construction

"XT" Xtreme temperature bands are the perfect answer for elevated operating temperatures in plastics processing on injection machine nozzles, extrusion dies and barrel heater bands. XT bands are often used in processing high temperature engineered resins such as PEEK™, Teflon®, Ultem®, and Zytel®

Benefits

- **Lower Cost**
- **Increased Production**
- **Quick & Responsive Heat Up**
- **Up to 90 W/In² in Watt Density**
- **1400F Operating Temperature**
- **Versatility Easily Made to Order Specifications**
